R 1365.00 (EXCLUDING VAT FOR NON-SAATCA AUDITORS)

R 1305.00 (EXCLUDING VAT FOR SAATCA REGISTERED AUDITORS)

Technological Trends in Auditing

Technology never fails to change the way we do things. It has transformed how we think, how we interact and how we do business. The auditing trends have continuously been shaping the auditing industry.

IAF MD 11:2019 Issue 2 - updates introduces an alternative methodology, the “Extended Auditing Approach”.

As a result of this main change, several editorial and document structural changes have also been introduced.

Advantages & Disadvantages of auditing integrated systems (ISO 9001:2015, ISO 14001:2015 and ISO 45001:2018)

Disadvantages of Integration:

Integration may threaten the coherence and consistency of current arrangements that have the support of everyone involved. Relevant specialists may continue to concentrate on the area of their core expertise, and further specialist training may not be needed.

Advantages of Integrated Systems:

An integrated management system is an effective organisational approach to simplify the work, avoid conflicts and reduce duplication of documents. Integrating management systems may lead to cost savings and efficient utilisation of resources within an organisation.
