The Impact of 4IR on Quality Management / Audit

What are the advantages and disadvantages of Fourth Industrial Revolution?

The adoption of 4IR technology also has the potential to fundamentally change the way the quality industry operates by assessing a wider range of data over a longer period of time.

Root Causes Analysis and 8D Corrective Action Process

The eight disciplines (8D) method is a problem-solving approach that identifies, corrects, and eliminates recurring problems. By determining the root causes of a problem, auditors can use this method to establish a permanent corrective action and prevent recurring issues.

Legal Compliance based on ISO 37301:2021

This standard specifies requirements and provides guidelines for establishing, developing, implementing, evaluating, maintaining and improving an effective compliance management system within an organization.
