

Embracing Net Zero: A Crucial Step Towards a Sustainable Future, a Strongest Tool Against the Climate change

SAATCA 4 Hour CPD POINT ONLINE WORKSHOP

Date: 08 November 2024

Time: 08:30 until 14:30

Cost:

R690 for Non-Registered Auditors

Registered Auditors R575

(Prices Include VAT)

1. Net Zero against the Climate Change.

Net zero is our strongest tool yet against the climate crisis. The transition to net-zero emissions presents a compelling solution that offers not only environmental benefits but also economic, social and health advantages. Failing to act swiftly and decisively risks catastrophic climate change including extreme weather events, sea-level rise, bio-diversity loss, and disruptions to food and water supplies.

Let's delve into the key reasons why embracing net zero is vital for our collective well-being:

- Tackling the climate crisis
- Protecting human health
- Driving innovation and economic growth
- Enhancing energy security
- Preserving ecosystems and bio-diversity

2. Panel Discussion based on Implementation of the Climate Change and how to meet Net Zero?

3. The main changes between ISO/TS 22003:2013 and ISO 22003-1:2022
