About the Workshop

ISO 9001 remains the world's leading standard for Quality Management Systems (QMS), enabling organizations to consistently provide products and services that meet customer and statutory requirements while enhancing customer satisfaction.

The ISO 9001:2026 edition introduces important enhancements to ensure organizations remain resilient, ethical, digitally enabled, and responsive to today's rapidly changing business environment.

The revised standard strengthens requirements relating to organizational culture, ethics, climate change, digital transformation, organizational knowledge, change management, evidence-based decision-making, and organizational resilience.

This one-day transition workshop has been designed to assist organizations certified to ISO 9001:2015, auditors, consultants, and quality professionals in understanding, auditing the new ISO 9001:2026 requirements.
